assess365

assess365 is a comprehensive security assessment of your complete company infrastructure including Microsoft 365 and Azure, to internationally recognised CIS™ standards.

Why assess365?

Decrypting your security stance can feel like running a marathon – long and draining. But with our turbo-charged blend of AI-powered tools, cutting-edge Microsoft tech and security wizards, you can glide through the process. With assess365 you can generate an in-depth insight into your organisation's security profile within weeks! Get started today to quickly discover how your cybersecurity fits within the global gold standard, **CIS™ (v8) Controls Security Framework**.

How does it work?

Utilising an industry-leading automated Cybersecurity Assessment tool, we examine all aspects of your infrastructure and environment including email, mobile devices, Azure AD Identity, Application Permissions, Windows Configuration, Access Management, Patch Management, plus much more.
