

A Microsoft Azure Security Case Study

Cambridge Based Biopharmaceutical Specialist

The Challenge

The company had moved over to a cloud based Microsoft Azure environment. The results were very popular with the users but provided a concern for the IT team. They didn't have the inhouse expertise to manage and secure their Azure environment.

They needed a solution, but they didn't want to hire an in house security administrator.

The Solution

Softwerx are a Microsoft Gold Partner and cyber security specialists.

They had the skills needed to manage and secure the company's cloud based Microsoft environment.

“We didn't want the cost of employing a security administrator, Softwerx are a great alternative.”

The Outcome

Softwerx have been able to deliver a multi-layered, comprehensive security service for the company's Microsoft 365 environment.

The company knows that they now have their system set up to provide the best possible protection from cyber attack ensuring security, privacy and regulatory compliance.

Ongoing support from Softwerx means that any issues that come up will be dealt with quickly, and any changes in best practice will be updated immediately.
