

Take back control of your email

Enterprise class Security, Continuity and Archive for businesses of all shapes and sizes, with no lock in.

mailsphere

softwerx

Security, Continuity & Archive

Protect against phishing attacks, viruses, spam, malware, data harvesting and Denial of Service attacks.

Send and receive emails during outages to your email service.

Keep copies of all emails remotely in your searchable, encrypted archive.

Security

Anti-Virus

- Protects against ransomware, Trojans, worms and viruses
- Real time threat identification and protection

Anti-Spam

- Phishing, Whaling and impersonation protection prevents targeted, email-based fraud
- Adjustable rulesets and filters
- End user access to spam quarantine

Continuity

- Send and receive email throughout disruption to your primary email service
- Access live and archive emails

Archive

- Captures all inbound and outbound emails and attachments
- Policy-based email archiving that meets compliance requirements
- Unlimited storage
- Secure, private, encrypted vault for confidentiality
- Powerful search and audit capability

Benefits

We believe that email should be accessible, useful and safe.

Mailsphere makes email a more productive and valuable asset.

Get your budget under control

- Low cost per mailbox, per month, with unlimited archive
- No set-up or migration charges to move your emails into the archive
- Only pay for the mailboxes you manage

Own your own data

- Your email is stored in your own personal archive
- Extract it whenever you want at no cost
- Keep a full record of emails, separate from your production email service

Simple to use

- Cut the bloat – only pay for features you use
- Control everything through our simple portal
- Round the clock support, 24/7/365

Straight-forward, affordable pricing

At Mailsphere, we never lock you in.

We've stripped away the features you don't need and never use. You get a secure and user friendly email security solution that's also good for your budget.

We won't charge you to move your old emails into our new archive. And if you decide to leave us, we won't hold your data hostage with exorbitant extraction charges.

Pay as You Go

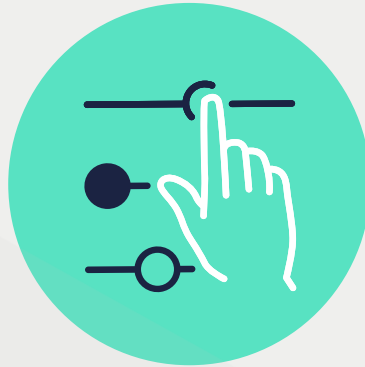

No commitment, pay as you go monthly pricing. Add or remove mailboxes whenever you need to.

Fixed Plan

If you know what you need, and for how long, save even more with a fixed plan.

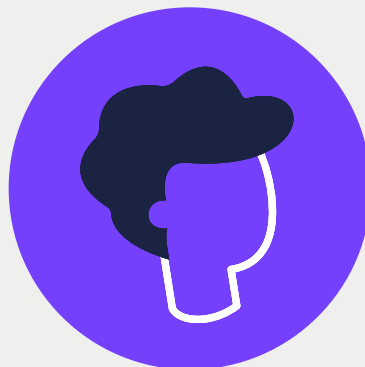

Support

Help for installation and setup

Robust SLAs

24/7 Support from a human

A bit about us

Mailsphere was created to give businesses peace of mind. Large or small, you know your email is protected and will continue through disruption. The Mailsphere team is dedicated to making that happen.

Our founders hail from business continuity specialist, Databarracks, HP and MessageLabs.

We bring experience in enterprise tech, focussed customer service and email security to deliver a modern solution fit for today's challenges.

With the team's years of combined expertise, your email is in safe hands.
