

Microsoft Security Assessment

Based on your tangible Microsoft Secure Score

With cyber attacks increasing in volume and sophistication, budgets being squeezed, and an overcrowded cyber security marketplace it has arguably never been harder for CISOs to see the wood from the trees.

A Microsoft Security Assessment – based around a tangible Microsoft Security Score – is a great way to understand where your business is, and more importantly, where it could go with a Microsoft First approach to security.

Not only will your team get expert technical analysis in the form of a detailed Report, but this same Report can be used at a management level to support investment and change.

Services that will be analysed:

- Microsoft Azure AD
- Microsoft Endpoint Manager
- Microsoft Defender for Cloud Apps
- Microsoft Defender for Office 365
- Microsoft Defender for Endpoint
- Microsoft Information Protection

Why Microsoft Security

Global capability

Microsoft monitors more than 20 trillion security signals every 24 hours.

Future-proof investment

Microsoft is investing \$20 billion in security over the next four years.

Best of breed

Microsoft is now leading in five different Gartner Magic Quadrants for security.

Seamless security

Only Microsoft can offer a uniquely seamless security experience.

Microsoft Security Assessment

A detailed analysis of your Microsoft online services environment

Your Microsoft Security Assessment provides a **detailed insight into your Microsoft online services** environment. You will receive a Report that includes an explanation of the approach taken, a presentation of our findings and a clear set of recommendations.

The information provided will give a **clear and independent overview of the Microsoft security services** that have been implemented and the extent to which they have been configured correctly to protect the IT environment.

The recommendations provided in this Report are intended to support your strategic Security Roadmap.

In the past year, we've leant on Softwerx's expertise to achieve a 40%+ increase in our Microsoft Secure Score posture. In fact, Secure Score and Azure Advisor now form part of our core Board metrics."

– Peter Messervy-Gross, Chief Information Officer, Altum Group

About Softwerx

With over twenty years' experience and a dedicated 24x7 Microsoft Security Operations Centre (SOC), Softwerx is one of the UK's leading Microsoft Security specialists.

Softwerx is trusted by over three hundred organisations and was one of the first Microsoft Partners in the UK to be awarded the specialist Microsoft Security Solutions Partner Competency.
